PREFACE

The present is the Twenty-fifth Annual Report on Vital Statistics to be issued by the Dominion Bureau of Statistics on data obtained under arrangement with Provincial Registration Departments. It is the twentieth report covering all provinces.

Until recently, vital statistics were all classified by place of occurrence. In 1944, however, the classification of births and deaths by place of residence was begun, births being classified by the place of residence of the mother. A number of special tabulations by place of residence have been made for a few years prior to 1944.

The First, Second and Third Annual Reports contain a full account of the origin and purpose of the agreement between the Dominion and the provinces for the production of vital statistics, together with a sketch of the earlier development of these statistics in Canada. Registration of births, deaths and marriages is carried out by the provincial authorities, each province having passed an act making registration compulsory and prescribing that certain items of information be obtained on a uniform basis. Transcripts of the certificates are forwarded to the Dominion Bureau of Statistics and from these the Annual Reports for Canada are compiled. For the year 1945, in addition to the preparation of tables for the present volume, the Bureau of Statistics issued quarterly reports and a preliminary annual report, and supplied to all provinces the compilations required for their respective reports.

As in past years, the statistics of births, deaths and marriages among the Indian population of the provinces are included in the comparative and analytical tables and in the general summary tables of the present report. They are also given separately in Appendix I. The Vital Statistics of Yukon and the Northwest Territories are not included in the comparative and analytical tables or in the general summary tables, but a summary thereof appears as Appendix II.

In tables classified by "rural" and "urban" the term "Urban" includes cities, towns and villages of 1,000 population and over, "Rural" the remaining parts. The classification of cities, towns and villages is according to the census of 1941.

Tables dealing with deaths by cause have been compiled in accordance with the Fifth Decennial Revision recommended by the International Commission for classification of Diseases and Causes of Death, at Paris, France, in October, 1938. Appendix III shows the relation between the Intermediate and Detailed International Lists. Appendix IV gives the number of cases of certain notifiable diseases reported in Canada, by provinces, during each month of 1945.

The present volume is issued without text, resembling in this respect previous Annual Reports beginning with the Ninth. In order, however, to make available to the reader the essential figures for rates and comparisons, twenty-nine tables containing such figures have been included in the report. They comprise the first section, under the title "Comparative and Analytical Tables". The Canada Year Book contains a summary and analysis of the vital statistics for 1945 in comparison with previous years. Reprints of this summary may be obtained on application to the Vital Statistics Branch, Dominion Bureau of Statistics.

The collection of the data and the preparation of the report were undertaken by the Vital Statistics Branch in co-operation with the Provincial Vital Statistics Offices, under the direction of J. T. Marshall, Chief of the Vital Statistics Branch.

Dominion Statistician.

PRÉFACE

Le Bureau fédéral de la Statistique présente son vingt-cinquième rapport annuel sur les statistiques vitales. Ce rapport est basé sur des renseignements obtenus en vertu de dispositions prises avec les divers services d'enregistrement provinciaux. Il est le vingtième à embrasser toutes les provinces.

Jusqu'à récemment, toutes les statistiques vitales étaient classées selon le lieu de survenance de l'événement. Depuis 1944, cependant, les naissances et les décès sont classés d'après le domicile, les naissances étant classées selon le domicile de la mère. Un certain nombre de tableaux spéciaux ont été dressés d'après le domicile pour quelques années antérieures à 1944.

Le premier, le deuxième et le troisième rapports annuels contiennent un exposé complet de l'origine et du but des dispositions prises entre le Dominion et les provinces en vue de l'établissement des statistiques vitales. Ils décrivent en outre brièvement les débuts de ces statistiques au Canada. Ce sont les autorités provinciales qui font l'enregistrement des naissances, des décès et des mariages, chaque province ayant adopté une loi rendant l'enregistrement obligatoire et exigeant que certains renseignements soient obtenus d'après une base uniforme. Des copies des certificats sont envoyés au Bureau fédéral de la Statistique d'après lesquels sont préparés les rapports annuels pour tout le Canada. En 1945, le Bureau fédéral de la Statistique, en plus de préparer ces tableaux, a publié des rapports trimestriels et un rapport annuel provisoire et a fourni à toutes les provinces les résultats des calculs dont elles avaient besoin pour la préparation de leurs propres rapports.

Comme par le passé, les statistiques des naissances, des décès et des mariages parmi la population indienne des provinces ont été incorporées aux tableaux comparatifs et analytiques de même qu'aux tableaux sommaires généraux du présent rapport. Elles sont aussi données séparément dans l'appendice I. Les statistiques vitales des Territoires du Yukon et du Nord-Ouest ne font pas partie des tableaux comparatifs et analytiques, ni des tableaux sommaires généraux. Elles sont données en résumé dans l'appendice II.

Dans les tableaux dressés selon les régions "rurales" et les régions "urbaines", le terme "urbaines" s'applique aux cités, villes et villages de 1,000 âmes et plus et le terme "rurales", aux régions qui restent. Les cités, villes et villages sont classés d'après le recensement de 1941.

Les tableaux portant sur les décès selon la cause ont été dressés conformément à la cinquième revision décennale recommandée à Paris, France, en octobre 1938, par la Commission Internationale pour la classification des décès et des causes de décès. L'appendice III indique la relation qui existe entre les listes internationales intermédiaire et détaillée. L'appendice IV donne le nombre de cas de certaines maladies déclarables constatés au Canada, par province, au cours de chaque mois en 1945.

Le présent ouvrage ne contient pas de texte. Il est semblable en ceci aux rapports annuels antérieurs à compter du neuvième. Toutefois, pour que le lecteur ait toujours à la vue les chiffres les plus importants relatifs aux taux et aux comparaisons, vingt-neuf tableaux contenant ces chiffres ont été incorporés au rapport. Ces tableaux forment la première section intitulée "Tableaux comparatifs et analytiques". L'Annuaire du Canada contient un résumé et une analyse des statistiques vitales de 1945 comparativement aux années antérieures. Des copies de ce résumé peuvent être obtenues sur demande à la Branche des statistiques vitales, Bureau fédéral de la Statistique.

La réunion des données et la préparation du rapport ont été faits par la Branche des Statistiques vitales, en collaboration avec les bureaux provinciaux des statistiques vitales sous la direction de J. T. Marshall, chef de la Branche des Statistiques vitales.

La traduction a été faite au Service de la traduction du Bureau fédéral de la Statistique sous la direction d'Emile Boucher, chef.

Statisticien du Dominion.

COMPARATIVE AND ANALYTICAL TABLES

TABLEAUX COMPARATIFS ET ANALYTIQUES

NOTES

Tables of births, deaths and marriages for Yukon and the Northwest Territories are given in Appendix II.

The figures of population in 1921, 1931 and 1941 are those given by the Census, those for Manitoba, Saskatchewan and Alberta in 1926 and 1936 are given by the census of the Prairie Provinces, while the figures for all the other years are estimates to the nearest thousand.

Divisions in British Columbia are census divisions and the correspondence of their subdivisions with those in Census publications is as follows: $5_A = 5a$, b, c, d; $5_B = 5e$, f; $6_A = 6a$, b, c; $6_B = 6d$, e, f; $8_A = 8a$, b, c, d; $8_B = 8e$, f, g; $9_A = 9a$; $9_B = 9b$; $9_C = 9c$, d, e; $9_D = 9f$; $10_A = 10a$; $10_B = 10b$; $10_C = 10c$, d.

"Urban" includes cities, towns and villages of 1,000 population and over, "Rural" the remaining parts. The classification of cities, towns and villages is according to the Census of 1941.

Les tableaux des naissances, des décès et des mariages pour le Yukon et les Territoires du Nord-Ouest sont donnés dans l'appendice II.

Les chiffres de la population en 1921, 1931 et 1941 sont ceux du recensement; ceux du Manitoba, de la Saskatchewan et de l'Alberta en 1926 et 1936 sont ceux du recensement des provinces des Prairies, et ceux de toutes les autres années sont des estimations au millier près.

Les divisions en Colombie-Britannique sont les divisions de recensement et leurs subdivisions correspondent comme suit aux subdivisions figurant dans les publications du recensement: $5_A = 5a$, b, c, d; $5_B = 5e$, f; $6_A = 6a$, b, c; $6_B = 6d$, e, f; $8_A = 8a$, b, c, d; $8_B = 8e$, f, g; $9_A = 9a$; $9_B = 9b$; $9_C = 9c$, d, e; $9_D = 9f$; $10_A = 10a$; $10_B = 10b$; $10_C = 10c$, d.

"Régions urbaines" comprennent les cités, villes et villages ayant une population de 1,000 âmes et au-dessus, le reste est inclus avec "Régions rurales". La classification des cités, villes et villages est selon le recensement de 1941.
